Mr. Willens:

I read attached portions marked in red on pages 6 and 7 to Mr. Specter on telephone. These pertain to his area. He thinks all should stay just as they are in testimony or report. For instance, he says the back brace and Ace bandage account for President sitting erect. He said the "God-damn" and McCloy's remark occurred just as stated and he sees no reason for changing testimony. He doesn't think the testimony says that doctors withheld pronouncing President dead until last rites.
